RELEVANT SKILLS AND COURSE WORK

Programming Languages Python, Java, C++, C; familiarity with Ruby, Bash, Haskell
Courses include Compilers, Graph Theory, Machine Learning, Design Patterns

Dynamic Generic Map (C++ 11)

- Implemented growable, templated map similar to `std::map` using a binary search tree
- $O(\log n)$ average case lookup and insertion; bidirectional iteration provided

Decision Tree for Music Genre Classification (Python)

- Implemented pre and post pruned decision tree to decide genre given a song's acoustic features
- Harnessed 3rd party libraries pandas and pydot for data processing and visualization respectively

Compiler Semantic Checking (Java)

- Implemented passes for name resolution and type checking for Decaf subset of Java

Dynamic Memory Allocation (C)

- Implemented dynamic memory functions malloc, free, and realloc via doubly-linked free list
-
